

Quality
that
goes **beneath**
the surface

At Let's Play Recreation, Inc., we're not only proud of the quality that goes into the surfacing products we install, but of the quality that goes into our work before the installation even happens.

Playgrounds. Backyards. Learning Centers. Stadiums. Arenas. Gold courses. Every site is different, and every site has different issues to address before the first tile, turf or mulch is put (or poured) in place. To ensure that long-lasting safety of our unique surfaces, we provide whatever work is necessary from the start—whether it involves removing existing surfacing, prepping the aggregate base, installing concrete or curbing, or more, you can be assured the quality surface we provide you has a strong foundation to stand on!

- Aggregate surfaces
- Installing concrete curbing
- Tearing out obtrusive objects/existing surfacing
- Landscaping preparation and more
